

The CardPointe QuickBooks plugin.

Everything you love about QuickBooks, combined with our best-in-class processing services.

Integrated payments for QuickBooks – *fast, easy, secure.*

Our QuickBooks plugin allows users to not only process transactions via our gateway, but also create accounting entries and automatically mark transactions as 'paid' without ever leaving the QuickBooks environment.

The screenshot shows the 'Pay' window in QuickBooks with the following fields:

QuickBooks Customer	Nick Smith	Name*	The Card Shoppe
Invoice #*	1040	Address	1000 Continental Dr
Account Type*	Visa	City	King Of Prussia

Expiration*	02-20	Country	USA
CVV	123	Email	nick@thecardshoppe.com
Amount*	435.78	<input checked="" type="checkbox"/> Store Profile	<input checked="" type="checkbox"/> Default
Currency*	USD	<input type="button" value="Make Payment"/> <input type="button" value="Cancel"/>	

* - Mandatory to Process

Low-Rate Processing

In addition to accommodating a variety of customer payment preferences (credit, debit, eCheck, etc.), you'll also receive the lowest possible rate for each transaction thanks to our gateway's interchange optimization feature.

Dynamic Reporting & Reconciliation

Our gateway collects fundamental business data (settlements, deposits and statements) all in one place. Better yet, our customizable reconciliation solution ensures reconciling cash-to-receipts is integrated and automated.

Security You Deserve

CardSecure®, our industry-leading security solution elevates the QuickBooks platform by instantly encrypting and tokenizing every transaction, resulting in PCI scope reduction and the ultimate data breach protection.

Immediate Set-Up

Our streamlined installation means you can start processing transactions within QuickBooks via the CardConnect gateway immediately – no wait time necessary. Should you run into an issue, our support team is readily available to assist you – **24/7.**

Our QuickBooks plugin is fully integrated with CardPointe, providing access to full transaction lifecycle reports, transaction management, customer profile storage and more.
